**PFAS emission restriction - ZESTRON® / VIGON® / ATRON® / HYDRON®
cleaning products without PFAS substances**

To whom it may concern,

the European Chemicals Agency (ECHA) published its proposed regulation for an EU-wide restriction on the use of PFASs (per- and polyfluoroalkyl substances) on 13th January 2023. With this regulation the PFAS emissions into the environment should be reduced and products should thus be made safer for people.

ZESTRON hereby confirms that none of our raw materials, substances, process aids and therefore none of our ZESTRON® / VIGON® / ATRON® / HYDRON® cleaning products contain any per- and polyfluoroalkyl substances.

For any additional questions, please do not hesitate to contact us at any time.

Best regards,

ZESTRON Europe
